

# Colour Master Sealer System

Searching for a cost-effective and trouble-free way of rejuvenating and enhancing old concrete surfaces such as driveways and pathways?

CCS Colour Master Sealers are designed to penetrate, restore and colour your concrete. This allows you to coat your plain concrete or even change the colour of your current decorative concrete with a longer lasting and superior alternative to paving paint. This opaque, UV resistant, rich coloured sealer provides a durable long-lasting coloured finish that will bring new life and colour to enhance the overall appearance of any property.

CCS Colour Master Sealers are a two-part sealer system formulated for colouring plain or old concrete in both domestic and light commercial applications. This high-performance sealer incorporates a strong resin that will withstand the harsh Australian weather conditions.

## Why Choose Colour Master Sealers?

- Provides superior adhesion over water based paving paints
- Resists oils, grease and general grime
- Recolours old stained concrete and pavers
- Introduces a change to the overall colour scheme of your concrete surrounds
- Easy to clean and maintain

## Ideal for external floors

- Driveways
- Pathways
- Pavements
- Patios
- Walkways

CCS uses computer generated imagery (CGI) to provide graphical representations of our products where actual photos are not available. The colours and finishes of the products featured within all CCS imagery are as close to the CCS range as CGI, photographic lighting and our printing processes allow. Different camera angles, although not designed to be misleading, can sometimes distort actual size and distances. We recommend checking your chosen colour against a sample of the product before purchasing as varying light conditions and limitations of the printing process affect colour tones. CCS are marketed and distributed by River Sands Pty Ltd ABN 41 009 919 215, trading as Concrete Colour Systems.
