

Rembrandt Concrete Stains

Have an existing interior concrete surface that needs a makeover? Creating a new decorative floor for residential or commercial use has never been easier with CCS Rembrandt Concrete Stains.

Stains are applied to CCS Stylepave resurfacing compound to produce an attractive finishing stain to create a wide variety of unique finishes such as:

- Marble,
- Sandstone,
- Tiles, and
- Wood grain textures

A finishing coat of CCS sealer protects the floor from spills and grime allowing for an easy to clean seamless finish.

Why Choose Rembrandt?

The advantage of Rembrandt Concrete Stains to other types of finishes are:

- Easy to clean smooth finish
- Long lasting
- Resistant to spills and moisture
- Complete water-based system
- Vast array of colour combinations
- Uniqueness – no two floors are the same
- Cost effective

Ideal for internal floors

- Rumpus rooms and home gyms
- Foyers, reception areas
- Light commercial – cafes and retail

How is a Rembrandt Concrete Stain Floor Created?

Preparation begins with a thorough cleaning to ensure a sound, uncoated concrete substrate. This allows for a strong bond to form between the surface, the products and coatings when applied.

CCS Stylepave Resurfacing Compound is applied, then any design feature chosen is added to the surface. This may consist of using tools, scribes and filament tape for particular patterns. The selected CCS Rembrandt Stain is applied to deliver a spectacular look. The last step in the process is to apply two clear top coats of either gloss or stain sealer.

Rembrandt Stains Colour Range

Antique Green

Aztec Red

Blue Stone

Midnight

Raw Umber

Saxon Brown

Sunflower

Vanilla

We may be able to create custom colours for your application. Simple provide us with either a sample swatch of the colour or the closest paint colour using a major paint company colour card.

CCS uses computer generated imagery (CGI) to provide graphical representations of our products where actual photos are not available. The colours and finishes of the products featured within all CCS imagery are as close to the CCS range as CGI, photographic lighting and our printing processes allow. Different camera angles, although not designed to be misleading, can sometimes distort actual size and distances. We recommend checking your chosen colour against a sample of the product before purchasing as varying light conditions and limitations of the printing process affect colour tones. CCS are marketed and distributed by River Sands Pty Ltd ABN 41 009 919 215, trading as Concrete Colour Systems.
