

# Stencilpave System

Stencilpave system combines the practicality and durability of concrete with classic design and colour options. Colour endurance is assured due to the robust UV resistant pigments and resins contained. With its grouted and rustic surface, the Stencilpave system provides a flat and sure footing for both pedestrian and vehicular traffic.

- The appearance of pavers
- Durable UV resistant pigments
- Custom patterns available
- Cost effective and attractive
- Installed with new laid concrete

## Ideal for

- Driveways
- Pathways
- Pavements
- Walkways

## How is the Stencilpave System created?

As the concrete slab is being laid, the Stencilpave system incorporates a stencil pattern that is rolled out from one side of the concrete surface to the other forming a continuous design. A colour hardener powder is then applied and once absorbed into the slab it is trowelled through. Once the stencil is removed and the slab has sufficiently dried to walk on, CCS Same Day Sealer is applied. After three days, two coats of CCS Hardseal or CCS Hi-Build Enduro is applied to ensure longevity of colour. Alongside your applicator, choose the colours and designs that will beautify and enhance your outdoor environment then sit back and enjoy the elegance of Stencilpave.

## Hardener Colour Range

Sandstone

Terracotta

Charcoal

Black

# Stencil Patterns

## In Stock | Patterns

**Bushrock**  
Average Size 230x225mm

**Running Bond**  
Brick Size 195x100mm

CCS uses computer generated imagery (CGI) to provide graphical representations of our products where actual photos are not available. The colours and finishes of the products featured within all CCS imagery are as close to the CCS range as CGI, photographic lighting and our printing processes allow. Different camera angles, although not designed to be misleading, can sometimes distort actual size and distances. We recommend checking your chosen colour against a sample of the product before purchasing as varying light conditions and limitations of the printing process affect colour tones. CCS are marketed and distributed by River Sands Pty Ltd ABN 41 009 919 215, trading as Concrete Colour Systems.
